

Prescription Drug Task Force of Ulster County

Prescription painkillers kill more Americans than heroin and cocaine combined.

Formed in 2013, the Prescription Drug Task Force is a joint initiative of the Ulster County Departments of Health and Mental Health and the Ulster Prevention Council. The Task Force mobilizes all sectors of the community to reduce prescription drug abuse.

Each day, more than 100 people die from an overdose of prescription drugs.

Please join us as we continue our efforts to keep our youth and communities safe.

For more information, call 458-7406.
